

Ideation Phase

Empathize & Discover

Date	31 January 2025
Team ID	_____
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	4 Marks

Empathy Map Canvas:

The empathy map is created for an employee who needs to request a rental car for official travel. It captures the user's behaviours, attitudes, goals and challenges from the user's perspective.

THINK & FEEL • I need the car on time. • I want a quick and clear approval. • I worry about delays and availability. • I want to know my request status.	SEE • Car rental request form. • Approval/request status. • Available car options. • Task and email updates.
HEAR • Approval instructions from the manager. • Updates from the transport team. • Information about vehicle availability. • Approval and fulfillment notifications.	SAY & DO • Submit a request through Service Catalog. • Enter date, pickup/drop locations, duration, car type and reason. • Follow up on pending approval. • Check fulfillment status.
PAIN • Manual coordination. • Unclear approval status. • Delays in vehicle assignment. • Incomplete or inconsistent information.	GAIN • Simple centralized request form. • Faster automated approval. • Clear request status. • Automatic fulfillment task creation. • Timely notifications.

Key User Insight

The user wants a simple, reliable way to request a rental vehicle without repeatedly coordinating with different teams. The ServiceNow solution addresses this by centralizing the request and automating approval, fulfillment and communication.
