

Car Rental Request Automation

Customer Journey Map — ServiceNow Service Catalog & Flow Designer

ENTER	<i>What does the requester experience as they begin?</i>
ENGAGE	<i>What happens in the core moments?</i>
EXIT	<i>What does the requester experience as the process finishes?</i>
EXTEND	<i>What happens after the request is completed?</i>

Steps	Interactions	Things / Digital Touchpoints	People	Goals & Motivations	Experience / Expected Outcome
1. Open Service Portal	Employee opens the ServiceNow service portal.	Service portal / browser	Employee	Find the car rental service quickly.	Simple navigation and clear catalog item.
2. Open Car Rental Request	Employee selects the Car Rental Request catalog item.	Catalog item page	Employee	Understand what information is required.	Clear form and instructions.
3. Enter Request Details	Employee enters date, pickup/drop location, duration, car type and reason.	Service Catalog form	Employee	Submit complete and correct information.	Easy-to-understand fields.
4. Submit Request	Employee submits the request and receives a request number.	Service Catalog / RITM	Employee	Know the request was received.	Immediate confirmation.
5. Approval Triggered	Flow Designer starts the approval process for the request.	Flow Designer / Approval record	Approver / Manager	Get the request reviewed.	Automated routing avoids manual follow-up.
6. Review & Approve	Approver reviews the request and approves or rejects it.	My Approvals / Approval record	Manager / Approver	Make a quick and informed decision.	Relevant request information is available.
7. Create Catalog Task	If approved, the flow creates a Catalog Task for the Transport Team.	Catalog Task (sc_task)	Transport Team	Arrange the required vehicle.	Automatic assignment reduces delay.
8. Get Catalog Variables	Flow retrieves the request variables needed for fulfillment.	Flow Designer data pills	Transport Team	Access accurate rental details.	No repeated data entry.
9. Arrange Vehicle	Transport Team uses the request details to arrange a suitable car.	Vehicle / transport records	Transport Team	Allocate the correct vehicle.	Availability and assignment are clear.
10. Notify Requester	The flow sends an email with the approval/fulfillment update.	Email / ServiceNow notification	Employee	Know what happens next.	Timely communication.
11. Complete Request	Transport task is completed and the rental request reaches completion.	Catalog Task / Request record	Employee + Transport Team	Receive the vehicle as requested.	Clear completion status.
12. Track Past Request	Completed request remains available for reference and future follow-up.	ServiceNow request history	Employee / Admin	Review previous requests when needed.	Traceability and better future planning.

Positive moments	Negative moments	Areas of opportunity
• Easy catalog submission • Immediate request number • Automated approval • Automatic task creation • Timely email updates	• Approval may remain pending • User may not know where to approve • Vehicle availability may be uncertain • Manual delays can affect fulfillment	• Make approval location clear • Show approval status on request • Add vehicle availability check • Provide clear requester notifications • Track fulfillment progress
